By [Jacqueline](#) • 1 Comment

[Peter A. McCullough, MD, MPH](#), just revealed that **the Chinese can load cow's milk with mRNA exosomes through "milk bubbles" and have already successfully orally immunized mice.**

In [McCullough's own words](#):

"The nation's food supply can be manipulated by public health agencies to influence population outcomes... **Now an oral route of administration is being considered specifically for COVID-19 vaccination using mRNA in cow's milk.**

["Zhang and his Chinese colleagues"](#) have demonstrated that a shortened mRNA code of 675 base pairs could be loaded into phospholipid (milk bubble) packets called exosomes derived from milk

and then using that same milk, be fed to mice. The mice gastrointestinal tract absorbed the exosomes, and **the mRNA must have made it into the blood stream and lymphatic tissue because antibodies were produced in fed mice against SARS-CoV-2 Spike protein** (receptor binding domain).” ([source](#))

Hear Dr. McCullough discuss this from 2:45 to 3:21 (the end).
(Marketing is apparently not here yet, but looks like it is on the way...)

35 seconds.

Cows Aren't Dying from COVID — Why Are They Injecting Them with mRNA?

An oral vaccine for SARS-CoV-2 RBD mRNA-bovine milk-derived

exosomes induces a neutralizing antibody response *in vivo*

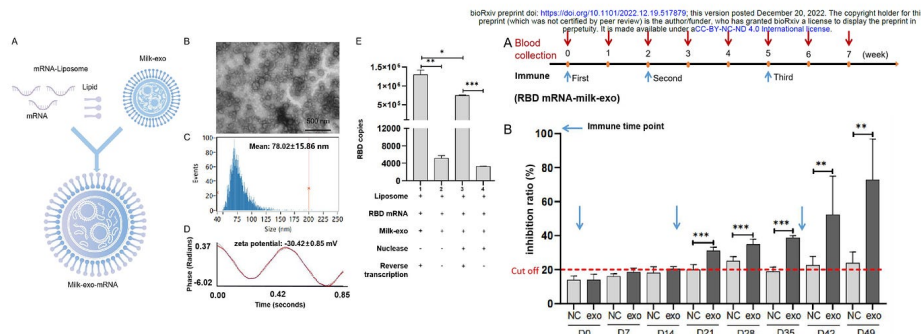

bioRxiv preprint doi: <https://doi.org/10.1101/2022.12.19.517879>; this version posted December 20, 2022. ([Source](#)) ‘In vivo’ means this is not being done in a test tube, but “within living organisms”. The research is done and ready to be implemented – we just don’t know where or when.

Dr. McCullough continues:

“From a scientific perspective, these experimental steps taken by the Chinese were a stunning success. **However, given the damage mRNA vaccines have generated in terms of injuries, disabilities, and deaths, these data raise considerable ethical issues.**

“[The COVID States Project](#) has shown that 25% of Americans were successful in remaining unvaccinated. **This group would have strong objections to mRNA in the food supply, particularly if it was done surreptitiously or with minimal labelling/warnings.**

“Children could be targeted with easily administered oral vaccine dosing or potentially get mRNA through milk at school lunches and other unsupervised meals.

“For those who have taken one of the COVID-19 vaccines, having milk vaccines.. would allow even more loading of the body with synthetic mRNA which **may reside permanently in the human body.**

“These observations lead me to conclude that **mRNA technology has just entered a whole new, much darker phase of development. Expect more research on and resistance to mRNA in our food supply.** The Chinese have just taken the first of what will probably be many more dangerous steps for the world.”

It is time to find local sources for about everything.

Other food that we know IS or IS ABOUT TO BE altered:

- [Beef](#)
- [Pork](#)
- [Fruits and veggies](#) including avocados, cucumbers, asparagus, lettuce, leafy greens, raspberries, and more.

[Dr. McCullough Now Officially Dropping Support for Flu Shot and Other ‘Routine’ Vaccines](#)

In an interview on [CHD.TV](#) with Dr. Paul Thomas, Dr. Peter McCullough give his professional reasons and the science behind his

decision!

"I'm Dropping Them!" - Dr. Peter McCullough Turns Vaccine Skeptic

“I could tell you through the course of my career, my personal life, I never questioned vaccines. I assumed they were safe and effective; it wasn’t my area of research. Doctors’... knowledge and our analyses of things change as the science changes, and based on those contemporary results, I’m dropping them! They’re no longer supportable to me, for my practice for myself.” ~Dr. Peter McCullough

Please STOP injecting anything into your children’s bodies (or yourself) that your doctor won’t sign off with a [Warranty of Vaccine Safety!](#)

“But examine everything carefully; hold fast to that which is good..” ~1 Thessalonians 5:21

Hi! I'm Jacqueline!

Thanks for being part of this journey with me.

Welcome to my own little place on the internet! Home is where I love to be. I feel there is no greater place to incubate souls. These days you'll find me using my experiences here to write about herbal remedies and natural health research — a big passion of mine. But being a wife and mother is not easy. It is challenging and potentially lonely. I get that. I wanted to create a place to connect with and support other moms for creating a natural, healthy, and fulfilling home life.
